

save

our wild salmon

move to closed containment

Pass Bill C-518

Dear Fin,

I am writing to express my support for your Bill C-518:

This legislation protects British Columbia's wild salmon by strengthening the Fisheries Act to require fish farms operating on BC's coast to make the transition to closed containment systems.

It requires that:

1. All commercial finfish aquaculture in BC be carried out in closed containment facilities.
2. The Minister of Fisheries and Oceans prepare, table and implement a closed containment transition plan.
3. That jobs be protected, including providing any needed training or income support through the Employment Insurance system.

Please urge your colleagues to protect wild salmon by supporting this important legislation.
